Abstract

This document describes new features, fixed limitations, upgrade changes, and known limitations of the Data Transformation MDM JavaBeans library.

For more information about the library, see the *Data Transformation Libraries Guide*.

CHAPTER 1

New Features

Data Transformation 10.0 supports the MDM JavaBeans library.

CHAPTER 2

Installing the Library

Before you create an MDM Java Beans service, you must install the library, and then restart the Developer tool.

Note: If you are running a previous version, you can update the library from this release 10 .ZIP file, following the Installing Libraries steps in the *Data Transformation Libraries Guide*.

1. To install the library, copy the MDM_JavaBeans.zip file to your local file system and unzip the file.
2. From the unzipped folder, copy the file MDM_import.tgp to the directory <Install_Dir>\<version>\clients\DT\autoInclude\system.
3. Copy the folder CmInternal_MDM_JavaBeans to the directory <Install_Dir>\<version>\clients\DT\bin\internalServices.

CHAPTER 3

Fixed Limitations

There are no fixed limitations.

CHAPTER 4

Known Limitations

There are no known limitations.

CHAPTER 5

Informatica Global Customer Support

You can contact a Customer Support Center by telephone or through the Online Support.

Online Support requires a user name and password. You can request a user name and password at http://mysupport.informatica.com.

The telephone numbers for Informatica Global Customer Support are available from the Informatica web site at http://www.informatica.com/us/services-and-training/support-services/global-support-centers/.
