Abstract. iv

Chapter 1: New Features. 5

Chapter 2: Installing the Library. 6

Chapter 3: Known Limitations. 7

Chapter 4: Informatica Global Customer Support. 8

Abstract

This document describes updates of the Data Transformation HIPAA library. For more information about the library, see the *Data Transformation Libraries Guide*.

CHAPTER 1

New Features

This release adds annotations to the .xsd schemas for the HIPAA library to support Relational to Hierarchical or Hierarchical to Relational transformations. Annotations were added to the DataElements element in the .xsd schemas.

CHAPTER 2

Installing the Library

Before you can use a Data Transformation library, you must install it.

Note: If you are running a previous version, you can update the library from this version 10.1.1 .zip file, following the Installing Libraries steps in the *Data Transformation Libraries Guide*.

1. Copy the library .zip file to your local file system and unzip the file.
2. From the unzipped folder, copy the folder `\<lib name>\Developer\DT` to the directory `<Install_Dir>\<version>\clients\`.

CHAPTER 3

Known Limitations

CR	Description
CM-7720	HIPAA validation is not supported for Edifecs version 6.x.
LIB-125	If the segment separators in a message are followed by newline characters, then the newlines must be used consistently. The library parsers might fail to recognize segments that are missing a newline. **Workaround:** Insert a newline consistently after every segment separator and at the end of the message. Alternatively, remove the newlines from every segment and from the end of the message.

CHAPTER 4

Informatica Global Customer Support

You can contact a Global Support Center by telephone or through Online Support on Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link:
http://www.informatica.com/us/services-and-training/support-services/global-support-centers.

If you are an Informatica Network member, you can use Online Support at http://network.informatica.com.
