Abstract

This document describes known limitations of the Data Transformation Bloomberg library. For more information about the library, see the *Data Transformation Libraries Guide*.

CHAPTER 1

Installing the Bloomberg Library

Before you create a Bloomberg service, you must install the Bloomberg library, and then restart the Developer tool.

Note: If you are running a previous version, you can update the library from this release 10 .ZIP file, following the Installing Libraries steps in the *Data Transformation Libraries Guide*.

1. To install the library, copy the Bloomberg library .ZIP file to your local file system and unzip the file.
2. From the unzipped folder, copy the file `Bloomberg_PS_Import.tgp` to the directory `<Install_Dir>\<version>\clients\DT\autoInclude\system`.
3. Copy the folder `CmInternal_Bloomberg` to the directory `<Install_Dir>\<version>\clients\DT\bin\internalServices`.

CHAPTER 2

Known Limitations

You might encounter the following limitations when you use the Bloomberg library.

If you encounter difficulties or have further questions regarding these limitations, contact Informatica Global Customer Support and reference the CR number.

The following table describes known limitations:

CR	Description
LIB-4025	The service does not process Bloomberg DLT response files.
LIB-3879	When HEADER is set to any value other than "yes," the service fails to parse the input.
LIB-3092	When OUTPUTFORMAT is set to "fixed," the service fails to parse the input.

CHAPTER 3

Informatica Global Customer Support

You can contact a Customer Support Center by telephone or through the Online Support.

Online Support requires a user name and password. You can request a user name and password at http://mysupport.informatica.com.

The telephone numbers for Informatica Global Customer Support are available from the Informatica web site at http://www.informatica.com/us/services-and-training/support-services/global-support-centers/.
