 For information about new features and enhancements, see *What's New*.

Fixed issues

The tables in this section describe recent fixed issues for Informatica Intelligent Cloud ServicesSM Monitor. Note that some releases might not include fixes.

November 2023 fixed issues

Issue	Description
CBDM-28473	When you monitor a dynamic mapping task that is based on a mapping in advanced mode, the runtime plan is not displayed in the individual job results when the entire job runs on an advanced cluster.

Known issues

The following table describes general Informatica Intelligent Cloud Services Monitor known issues in this release. The (<release>) value in each issue description indicates the release in which the issue was reported.

Issue	Description
CLDDI-6177	When you view subtasks for a dynamic mapping task, Informatica Intelligent Cloud Services displays subtasks with the mapping instance name instead of the dynamic mapping task job name. (May 2021 release)
CBDM-27145	When you run a mapping in advanced mode and a task fails within a stage of a Spark job, the Input Size / Records and Output Size / Records might be incorrect for the Spark job. Note: Data Integration reattempts to run the task until it is successful. (April 2023 release)

Informatica Global Customer Support

You can contact a Global Support Center through the Informatica Network or by telephone.

To find online support resources on the Informatica Network, click **Contact Support** in the Informatica Intelligent Cloud Services Help menu to go to the **Cloud Support** page. The **Cloud Support** page includes system status information and community discussions. Log in to Informatica Network and click **Need Help** to find additional resources and to contact Informatica Global Customer Support through email.

The telephone numbers for Informatica Global Customer Support are available from the Informatica web site at <https://www.informatica.com/services-and-training/support-services/contact-us.html>.
