Use the *Data Transformation HIX Library Release Notes* to learn about fixed and known limitations in the Data Transformation HIX library.

To run HIX library version 10.5, you must use Informatica Developer version 10.5. You can't run this version of the library with earlier versions of Informatica Developer.

For more information about the library, see the *Data Transformation Libraries Guide*.

New Features

This release adds a speed-enhanced Data Transformation engine for VRL validations to the HIX Data Transformation Library. This enhancement does not affect the existing Data Transformation services that use VRL validations.

The speed-enhanced Data Transformation engine supports the following VRL functions:

- `dt:exist`
- `dt:empty`
- `dt:date-valid`
- `dt:next-sequence`
- `dt:all-equal`
- `dt:lookup`
- `dt:regex-match`

The speed-enhanced Data Transformation engine produces the output **ValidateValue**. **ValidateValue** contains the property `max_error_count`, with a default of 200 errors. When the number of errors exceeds the `max_error_count`, the validation stops.

Fixed Limitations

This release has no fixed limitations.

Known Limitations

This release includes the following known limitations.

The speed-enhanced Data Transformation engine VRL syntax does not support the `<list>` tag.

Informatica Global Customer Support

You can contact a Global Support Center by telephone or through the Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link:

<https://www.informatica.com/services-and-training/customer-success-services/contact-us.html>.

To find online support resources on the Informatica Network, visit <https://network.informatica.com> and select the eSupport option.
