

## Supported Upgrade Paths to Informatica 10.2.1

# Abstract

Informatica 10.2 HotFix 2 contains various improvements and enhancements to the Informatica domain. Informatica provides a list of supported upgrade paths for users who want to upgrade their product. This article describes the supported upgrade paths to upgrade to Informatica 10.2 HotFix 2.

# Supported Versions

- Big Data Management ® 10.2.1
- Big Data Streaming 10.2.1
- Big Data Quality 10.2.1
- Enterprise Data Catalog 10.2.1
- Enterprise Data Lake 10.2.1

# Informatica Upgrade Paths Overview

To upgrade the Informatica products, follow the upgrade paths that Informatica supports.

Before performing an upgrade, please review the [Release Notes](#).

Use the supported upgrade paths for the following Informatica products and see more information about the documents and caveats associated with each path:

- Big Data Management
- Big Data Streaming
- Big Data Quality
- Enterprise Data Catalog
- Enterprise Data Lake

When you perform the upgrade, upgrade to the latest HotFix version of the latest release.

# Informatica Upgrade Paths

The Informatica platform consists of a server component and one or more client components. Informatica provides separate installers to upgrade the Informatica services and clients.

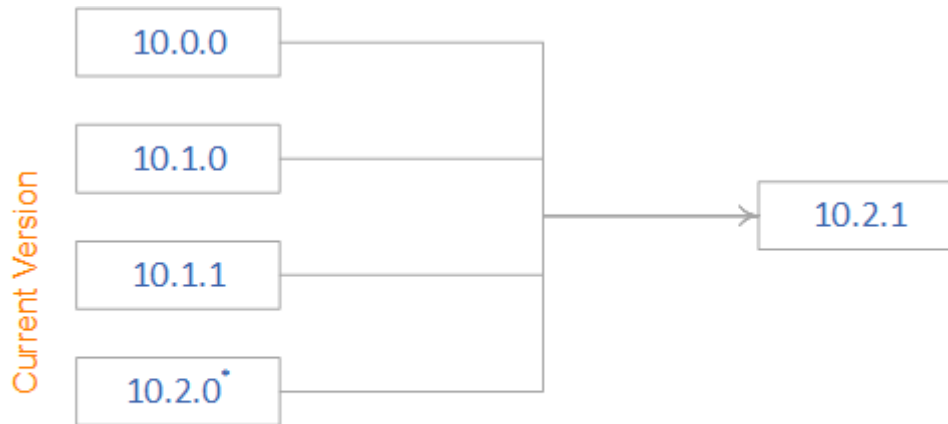

If the product version that is currently installed cannot be upgraded to Informatica 10.2.1, you must first upgrade to a supported version, to determine which Informatica product is currently installed, click **Help > About Informatica Administrator** in the Informatica Administrator header area.

## All Supported Upgrade Paths to Big Data 10.2.1

When you upgrade from a previous version to the latest version, follow the supported upgrade path to ensure a smooth and successful upgrade.

Before you upgrade, back up the Big Data files that were created under previous versions. After you complete the upgrade, copy the files to the new installation directories to get the same workspace, repository, custom global components, and library files as in the previous version.

The following image shows the upgrade paths for Big Data:

\* Version 10.2 HotFix 1 was released after version 10.2.1, and Informatica does not support the upgrade from 10.2.1 to 10.2 HotFix 1. The upgrade process might succeed, but you might experience results that are not supported.

## Upgrade Documentation

The Informatica Doc Portal has many resources available to help you during the upgrade process.

For information about upgrading Big Data Management, Big Data Streaming, Big Data Quality, Enterprise Data Catalog, or Enterprise Data Lake, see the following documents:
