# Preface

Read *What's New* to learn about new features, enhancements, and behavior changes in *Data Profiling*.

## Informatica Resources

Informatica provides you with a range of product resources through the Informatica Network and other online portals. Use the resources to get the most from your Informatica products and solutions and to learn from other Informatica users and subject matter experts.

### Informatica Network

The Informatica Network is the gateway to many resources, including the Informatica Knowledge Base and Informatica Global Customer Support. To enter the Informatica Network, visit <https://network.informatica.com>.

As an Informatica Network member, you have the following options:

- Search the Knowledge Base for product resources.
- View product availability information.
- Create and review your support cases.
- Find your local Informatica User Group Network and collaborate with your peers.

### Informatica Knowledge Base

Use the Informatica Knowledge Base to find product resources such as how-to articles, best practices, video tutorials, and answers to frequently asked questions.

To search the Knowledge Base, visit <https://search.informatica.com>. If you have questions, comments, or ideas about the Knowledge Base, contact the Informatica Knowledge Base team at [KB\\_Feedback@informatica.com](mailto:KB_Feedback@informatica.com).

### Informatica Documentation

Use the Informatica Documentation Portal to explore an extensive library of documentation for current and recent product releases. To explore the Documentation Portal, visit <https://docs.informatica.com>.

If you have questions, comments, or ideas about the product documentation, contact the Informatica Documentation team at [infa\\_documentation@informatica.com](mailto:infa_documentation@informatica.com).

## Informatica Product Availability Matrices

Product Availability Matrices (PAMs) indicate the versions of the operating systems, databases, and types of data sources and targets that a product release supports. You can browse the Informatica PAMs at <https://network.informatica.com/community/informatica-network/product-availability-matrices>.

## Informatica Velocity

Informatica Velocity is a collection of tips and best practices developed by Informatica Professional Services and based on real-world experiences from hundreds of data management projects. Informatica Velocity represents the collective knowledge of Informatica consultants who work with organizations around the world to plan, develop, deploy, and maintain successful data management solutions.

You can find Informatica Velocity resources at <http://velocity.informatica.com>. If you have questions, comments, or ideas about Informatica Velocity, contact Informatica Professional Services at [ips@informatica.com](mailto:ips@informatica.com).

## Informatica Marketplace

The Informatica Marketplace is a forum where you can find solutions that extend and enhance your Informatica implementations. Leverage any of the hundreds of solutions from Informatica developers and partners on the Marketplace to improve your productivity and speed up time to implementation on your projects. You can find the Informatica Marketplace at <https://marketplace.informatica.com>.

## Informatica Global Customer Support

You can contact a Global Support Center by telephone or through the Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link:

<https://www.informatica.com/services-and-training/customer-success-services/contact-us.html>.

To find online support resources on the Informatica Network, visit <https://network.informatica.com> and select the eSupport option.

# CHAPTER 1

## December 2022

The December 2022 release of Informatica Intelligent Cloud Services™ Data Profiling includes the following updates.

### New features and enhancements

The December 2022 release of Informatica Intelligent Cloud Services™ Data Profiling includes the following new features and enhancements:

#### [Stakeholder information for rule occurrences](#)

You can view stakeholders information for the rule occurrences that you create. A stakeholder is an authorized user who is responsible for the rule occurrence, and can approve or reject change requests for the occurrence.

The stakeholders get assigned if the organization administrator enables the Data Governance and Catalog Stakeholdership and Participate in Change Approvals privileges for the user role.

#### [Exception Management](#)

You can configure a rule specification as part of a process to identify exception records in your data set. An exception is a record that contains unresolved data quality issues. To identify exception records, you add a rule specification to a profiling task, and you create an exception task from the profiling task. At run time, the exception task applies the rule specification that you selected to the source data. You can download the exception records that the rule specification identifies.

For more information, see the Exception Management guide.

#### [Support for Java transformation in a mapplet](#)

You can add a passive mapplet that uses a Java transformation as a rule to a profile. Also, you can add a mapplet that contains a passive Java transformation to a rule statement in a rule specification.

Before you add the mapplet to a rule statement, compile the passive Java transformation on an elastic server in Data Integration.

#### [Support profiling of parquet files with 150 or more columns](#)

You can create a profile with a parquet source object that contains 150 or more columns.
