Chapter 4: 10.2.0 HotFix 2 Known Limitations..... 9

Chapter 5: Test Data Management 10.2.0 HotFix 1..... 10

10.2.0 HotFix 1 Fixed Limitations. 10

10.2.0 HotFix 1 Known Limitations. 10

Chapter 6: Test Data Management 10.2 R1..... 11

10.2 R1 Fixed Limitations. 11

10.2 R1 Known Limitations. 11

Chapter 7: Informatica Global Customer Support..... 12

Abstract

This document contains information on fixed and known limitations for Test Data Management.

CHAPTER 1

Installation and Upgrade

Perform the following steps to install or upgrade to Test Data Management (TDM) 10.2.0 HotFix 2:

1. Install or upgrade to Informatica service 10.2.0 HotFix 2.
2. Use the TDM installer to install or upgrade to TDM 10.2.0 HotFix 2.
You can upgrade from TDM versions 10.2 R1 and 10.2.0 HotFix 1. If you have a version earlier than 10.2 R1, you must first upgrade to at least TDM 10.2 R1. See the corresponding upgrade guide for information about how to upgrade to the required version.

CHAPTER 2

Emergency Bug Fixes in 10.2.0 HotFix 2

Test Data Management 10.2.0 HotFix 2 includes the following emergency bug fixes:

EBF	CR	Description
EBF-13152	TDM-7334	Performance issues noted when you open a plan in a project that contains many objects.
EBF-13200	TDM-7362 TDM-7555	Table name and details do not appear on the Plan Components tab on the Data Sets page.
EBF-13286	TDM-7453	A workflow that you configure to disable identity fails if it contains a Microsoft SQL Server database.
EBF-13361	TDM-7548	You cannot generate a workflow if the workflow contains an Advanced masking rule.
EBF-13559	TDM-7736	You cannot use a connection parameter for a target JDBC connection.
EBF-13570	TDM-7742	A workflow fails to re-create constraints in tables that contain a composite foreign key column and the Alter Table command.
EBF-13588	TDM-7740	If you apply EBF-12775 on TDM 10.1 and set the INFA_REPCNX_INFO environment variable in the PowerCenter machine, you cannot import metadata in Test Data Manager.
EBF-13623	TDM-7758	A job to reset a data set to a target, creates multiple primary keys in the target.
EBF-13680	TDM-7776	Performance issues noted when you open a plan in a project.
EBF-13712	TDM-7795	You cannot configure Pre and Post SQL queries on a target in a plan.
EBF-13760	TDM-7814	X-XSS-Protection HTTP header is missing.
EBF-13762	TDM-7816	A data subset contains incorrect results if the source contains multiple unique keys within the table with the primary key.
EBF-13783	TDM-7821	You cannot perform format-preserving encryption masking in an Advanced rule.

EBF	CR	Description
EBF-13842	TDM-7862	A workflow that includes the Disable Constraints option does not return any results.
EBF-13876	TDM-7874	A reset job fails if a foreign key column references a partial primary key.
EBF-13953	TDM-7952	PowerCenter Designer generates a mapping that is not valid because of issues with parameter data type mismatch.
EBF-14064	TDM-8035	An input string DEFAULT generates a <code>java.lang.NumberFormatException</code> in the main thread.
EBF-14095	TDM-8045	Performance issues on Azure SQL Data Warehouse.
EBF-14231	TDM-8138	There are no REST APIs to create and delete connections.
EBF-14439	TDM-8147 TDM-8277	Import of the Assignment.xml file generated by Secure@Source fails with an exception.

CHAPTER 3

10.2.0 HotFix 2 Fixed Limitations

Review the Release Notes of previous releases for information about previous fixed limitations.

The following table describes fixed limitations:

CR	Description
TDM-2307	A job that includes function-based indexes fails during index creation.
TDM-2908	A profile fails to run with an error: <code>com.informatica.jdbc.sqlserverbase.ddc: [informatica] [SQLServer JDBC Driver] [SQLServer] Arithmetic overflow error converting real to data type numeric. getUpdateCounts()..</code>
TDM-3098	A plan that contains a group generates a workflow with index and constraint command task errors that cause the Drop Index to fail.
TDM-3832	A data subset workflow that includes sequential files returns unexpected results.
TDM-6759	A key masking rule creates inconsistent results if you apply the same rule to two columns.
TDM-6825	You cannot import a project that contains ad hoc expression generation rules.
TDM-7867	Incorrect target table definition generated.

CHAPTER 4

10.2.0 HotFix 2 Known Limitations

The following table describes known limitations:

CR	Description
TDM-8314	Workflow generation fails if the workflow includes a mapplet with the data masking transformation and a substitution masking rule. Workaround: Create a substitution masking rule with the same masking logic in Test Data Manager and run the plan instead of using a mapplet.
TDM-8468	On an AIX environment, the Upgrade Content option of the Test Data Warehouse Service is not visible post upgrade. Workaround: Stop the Test Data Warehouse Service and click the service again. The Upgrade Content option appears. Upgrade the content and then start the service.
TDM-8496	A workflow that contains tables with special characters fails if you choose the Case Sensitive Metadata option.
TDM-8500	In a Kerberos environment, you might not be able to create the Test Data Manager Service from Informatica Administrator on a node that is not a master node. Workaround: Use the <i>infacmd</i> command line program to create the service. You can then enable the service and create the content from Informatica Administrator or the <i>infacmd</i> command line program.
TDM-8513	If you edit a Kerberized Microsoft SQL Server connection, the Save button is unavailable. Workaround: Update the required connection properties, and then uncheck the Use Kerberos Authentication option and select it again. The Save button becomes available.

CHAPTER 5

Test Data Management 10.2.0 HotFix 1

This chapter includes the following topics:

- [10.2.0 HotFix 1 Fixed Limitations, 10](#)
- [10.2.0 HotFix 1 Known Limitations, 10](#)

10.2.0 HotFix 1 Fixed Limitations

Review the Release Notes of previous releases for information about previous fixed limitations.

The following table describes fixed limitations:

CR	Description
TDM-6633	Workflow execution fails if you use a Microsoft SQL Server connection as the dictionary connection to apply a dictionary generation rule on a column.
TDM-6636	Workflow execution fails when you apply a masking rule on a column in the source data if the source data contains an identity column and a computed column that is a primary key.

10.2.0 HotFix 1 Known Limitations

The following table describes known limitations:

CR	Description
TDM-7381	You cannot generate a workflow that contains data subset with the one-way method of data integration and cascade masking.
TDM-7382	You cannot generate a workflow that contains data subset with the two-way method of data integration and cascade masking.

CHAPTER 6

Test Data Management 10.2 R1

This chapter includes the following topics:

- [10.2 R1 Fixed Limitations, 11](#)
- [10.2 R1 Known Limitations, 11](#)

10.2 R1 Fixed Limitations

There are no fixed issues in this release.

Review the Release Notes of previous releases for information about previous fixed limitations.

10.2 R1 Known Limitations

The following table describes known limitations:

CR	Description
TDM-4956	Workflow execution fails if you apply a shuffle masking rule on data that you import from a PostgreSQL data source and the metadata is case-sensitive. Workaround: Use schemas, tables, and columns with names in lowercase characters in a plan.
TDM-6629	When you run a plan with a format preserving encryption masking rule in a Kerberos environment, the status of the workflow is not updated in the Monitor view.
TDM-6557	A reset data set task with the truncate table option fails if the data set contains tables from different schemas. Workaround: Reset a data set with tables from a single schema, or enter a target connection with a single schema during reset.

CHAPTER 7

Informatica Global Customer Support

You can contact a Global Support Center by telephone or through the Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link:

<https://www.informatica.com/services-and-training/customer-success-services/contact-us.html>.

To find online support resources on the Informatica Network, visit <https://network.informatica.com> and select the eSupport option.
