Read the *API Portal Release Notes* to learn about known limitations in API Portal.

For information about new features and enhancements, see *What's New*.

Fixed Limitations

CR	Description
AP-224	When you click the Swagger link of a JWT-authenticated API in the detail window, the Swagger output doesn't show.
ICAI-27043	The Swagger tab for a managed API does not show the input and output field descriptions that you configured in the Application Integration process. (May 2022 release)

Known Limitations

CR	Description
AP-435	The organization name doesn't appear on the API Portal title bar.
AP-416	The following limitation applies only to organizations using custom domain name: If an API name containing non-Latin characters is added to a group with URL context, all access requests to the API fail, and return the HTTP response status code 404: <code>The requested resource is not found.</code> Workaround: Use only Latin characters in the group context and API name.
AP-370	API Gateway does not support the <code>DOCTYPE</code> Header in XML attachments. Workaround: Remove the <code>DOCTYPE</code> Header from XML attachments.

Informatica Global Customer Support

You can contact a Global Support Center by telephone or through the Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link:

<https://www.informatica.com/services-and-training/customer-success-services/contact-us.html>.

To find online support resources on the Informatica Network, visit <https://network.informatica.com> and select the eSupport option.
