Preface

Read *What's New* to learn about new features and enhancements in Data Validation for the July 2025 release.

Informatica Resources

Informatica provides you with a range of product resources through the Informatica Network and other online portals. Use the resources to get the most from your Informatica products and solutions and to learn from other Informatica users and subject matter experts.

Informatica Documentation

Use the Informatica Documentation Portal to explore an extensive library of documentation for current and recent product releases. To explore the Documentation Portal, visit <https://docs.informatica.com>.

If you have questions, comments, or ideas about the product documentation, contact the Informatica Documentation team at infa_documentation@informatica.com.

Informatica Intelligent Cloud Services web site

You can access the Informatica Intelligent Cloud Services web site at <http://www.informatica.com/cloud>. This site contains information about Informatica Cloud integration services.

Informatica Intelligent Cloud Services Communities

Use the Informatica Intelligent Cloud Services Community to discuss and resolve technical issues. You can also find technical tips, documentation updates, and answers to frequently asked questions.

Access the Informatica Intelligent Cloud Services Community at:

<https://network.informatica.com/community/informatica-network/products/cloud-integration>

Developers can learn more and share tips at the Cloud Developer community:

<https://network.informatica.com/community/informatica-network/products/cloud-integration/cloud-developers>

Informatica Intelligent Cloud Services Marketplace

Visit the Informatica Marketplace to try and buy Data Integration Connectors, templates, and mapplets:

<https://marketplace.informatica.com/>

Data Integration connector documentation

You can access documentation for Data Integration Connectors at the Documentation Portal. To explore the Documentation Portal, visit <https://docs.informatica.com>.

Informatica Knowledge Base

Use the Informatica Knowledge Base to find product resources such as how-to articles, best practices, video tutorials, and answers to frequently asked questions.

To search the Knowledge Base, visit <https://search.informatica.com>. If you have questions, comments, or ideas about the Knowledge Base, contact the Informatica Knowledge Base team at KB_Feedback@informatica.com.

Informatica Intelligent Cloud Services Trust Center

The Informatica Intelligent Cloud Services Trust Center provides information about Informatica security policies and real-time system availability.

You can access the trust center at <https://www.informatica.com/trust-center.html>.

Subscribe to the Informatica Intelligent Cloud Services Trust Center to receive upgrade, maintenance, and incident notifications. The [Informatica Intelligent Cloud Services Status](#) page displays the production status of all the Informatica cloud products. All maintenance updates are posted to this page, and during an outage, it will have the most current information. To ensure you are notified of updates and outages, you can subscribe to receive updates for a single component or all Informatica Intelligent Cloud Services components. Subscribing to all components is the best way to be certain you never miss an update.

To subscribe, on the [Informatica Intelligent Cloud Services Status](#) page, click **SUBSCRIBE TO UPDATES**. You can choose to receive notifications sent as emails, SMS text messages, webhooks, RSS feeds, or any combination of the four.

Informatica Global Customer Support

You can contact a Global Support Center through the Informatica Network or by telephone.

To find online support resources on the Informatica Network, click **Contact Support** in the Informatica Intelligent Cloud Services Help menu to go to the **Cloud Support** page. The **Cloud Support** page includes system status information and community discussions. Log in to Informatica Network and click **Need Help** to find additional resources and to contact Informatica Global Customer Support through email.

The telephone numbers for Informatica Global Customer Support are available from the Informatica web site at <https://www.informatica.com/services-and-training/support-services/contact-us.html>.

CHAPTER 1

July 2025

The July 2025 release of Data Validation includes the following update.

New features and enhancements

The July 2025 release of Data Validation includes the following new feature and enhancement.

[Support for flat file format in Amazon S3 v2 connections](#)

You can create test cases for flat files within an Amazon S3 v2 connection.

For more information, see *Introducing Data Validation and Test Cases*.

CHAPTER 2

April 2025

The April 2025 release of Data Validation includes the following update.

New features and enhancements

The April 2025 release of Data Validation includes the following new feature and enhancement.

[Support for Salesforce connections](#)

Data Validation supports Salesforce connections. You can create test cases and saved SQL queries for Salesforce objects.

For more information, see *Introducing Data Validation*.

CHAPTER 3

November 2024

The November 2024 release of Data Validation includes the following updates.

New features and enhancements

The November 2024 release of Data Validation includes the following new features and enhancements.

[New UI experience](#)

The Data Validation user interface has a new look and feel that presents the features you'll use in greater clarity.

After you upgrade to the November 2024 release, you must clear the browser cookies to view the new user interface.

[Ability to specify schema names for Google BigQuery V2 connections](#)

When you select a Google BigQuery V2 connection in the test case wizard, you can enter a schema name to get a list of objects.

For more information, see *Test Cases*.

CHAPTER 4

October 2024

The October 2024 release of Data Validation includes the following update.

New features and enhancements

The October 2024 release of Data Validation includes the following new feature and enhancement.

[Parameterization support for WHERE clause](#)

When you use a WHERE clause to enable data sampling for a Data Validation test case, you can parameterize the WHERE clause to provide different values at run time.

You can download a sample parameter file from the test case creation wizard. Then, define the parameter names and values in the file, and save it in a directory relative to your Secure Agent.

For more information, see *Test Cases*.

CHAPTER 5

August 2024

The August 2024 release of Data Validation includes the following update.

New features and enhancements

The August 2024 release of Data Validation includes the following new feature and enhancement.

[Support for Microsoft Azure Data Lake Storage Gen2 and SAP HANA connections](#)

Data Validation supports Microsoft Azure Data Lake Storage Gen2 and SAP HANA connections.

If you use a Microsoft Azure Data Lake Storage Gen2 connection, you can create test cases for files of the following formats:

- Avro
- CSV flat file
- JSON
- ORC
- Parquet

For more information about these connections, see *Introducing Data Validation*.

CHAPTER 6

July 2024

The July 2024 release of Data Validation includes the following updates.

New features and enhancements

The July 2024 release of Data Validation includes the following new features and enhancements.

[Support for saved SQL queries](#)

You can use an SQL query to compare data from the following databases:

- Amazon Redshift v2
- Databricks Delta
- DB2
- Google BigQuery V2
- Microsoft Azure Synapse SQL
- MySQL
- Oracle
- PostgreSQL
- Snowflake Data Cloud
- SQL Server

You can then save the SQL query and reuse the saved SQL query in multiple test cases.

Using SQL queries, you can use combine multiple data sets and filter data.

For more information about using saved SQL queries, see *Saved SQL Queries*.

[REST APIs for saved SQL queries](#)

You can use REST APIs to perform the following tasks:

- Create a saved SQL query.
- Update a saved SQL query.
- Get the supported database types for a saved SQL query.
- Get information about a saved SQL query.
- Create a test case using a saved SQL query as one or both of the sources.

For more information about using REST APIs for saved SQL queries, see *REST API Reference*.
