Read the Informatica® SSA-NAME3 Release Notes to learn about fixed limitations and known limitations of the release.

Installing or Upgrading SSA-NAME3

To install or upgrade SSA-NAME3, you must install or upgrade MDM Registry Edition. Before you install or upgrade MDM Registry Edition, see the following documents:

- *Informatica MDM Registry Edition 10.2 HotFix 1 Installation and Configuration Guide*
- *Informatica MDM Registry Edition 10.2 HotFix 1 Release Notes*
- *Informatica SSA-NAME3 10.2 HotFix 1 Release Notes*

For more information about product requirements and supported platforms, see the Product Availability Matrix: <https://network.informatica.com/community/informatica-network/product-availability-matrices>.

10.2 HotFix 1 Fixed Limitations

The following table describes fixed limitations:

Reference Number	Description
IR-1781	The <code>ABBR</code> word match returns a score without checking whether the <code>RAW</code> or <code>STD</code> compare options can get a better score.
IR-1763	The <code>CLIMIT NOINCR, 1</code> option incorrectly applied no excess penalty even if the <code>CLIMIT</code> option did not rescore two records.
IR-1754	If the secondary name match saves a wrong category name in the word stack, the <code>CATSW</code> option provides an incorrect score.

Reference Number	Description
IR-1748	<p>When the version of Windows in the system where you have SSA-NAME3 Workbench installed is different from the version of Windows in the license information file, the SSA-NAME3 Workbench does not open. You get the following error message:</p> <pre>Error validating lic file 'C:\IIRTenTwoHF1-5\InfaIR_20210421211054.key' ssa.ssautil.SSAObsoleteException: ssan3_open failed rc=1 license manager check for population 'australia' failed - rc=-1</pre> <p>The log file incorrectly displays random values.</p>
IR-1740	When you match two words that were split using a prefix or postfix split rule, the CATSWEXT local option does not return the expected score.
IR-1674	The <code>ssan3_match</code> call returns a score greater than 100 if you specify the <code>GROUP</code> control.
IR-1613	The <code>ssan3_match</code> call provides inconsistent match scores for the same second names separated by a space when you use the Arabic population. For example, SEYED HASAN and SEYEDHASAN.
IR-1548	If you select an international population and select the Organization purpose to match Atlas07 Property and Bmb Properties, SSA-NAME3 provides a high match score even though the addresses do not match.
IR-1535	If you do not specify a purpose for the <code>map_profile</code> item in the <code>ssan3_info</code> call, SSA-NAME3 returns a configuration document without the purpose instead of displaying an error message.
IR-1520	The <code>ssan3_info</code> call fails if you add parentheses () to the <code>Purpose</code> control in the search definition.
IIR-927	The Match Explain function does not work with multiple purposes.

Cumulative Known Limitations

The following table describes known limitations that are carried forward from previous releases:

Reference Number	Description
IIR-2799	<p>When you perform a search that uses the Filter field in the LWM_FIELDS control, you get the following unclear error message:</p> <pre>NAME3V2 match failed 'Could not find field 'Filter<number>''</pre> <p>Workaround: Remove the Filter field from the LWM_FIELDS control because the LWM_FIELDS control does not support the Filter fields.</p>
IIR-2117	On Windows, if the installation of SSA-NAME3 in console mode fails, the <code>errorlevel</code> value does not change from 0.
IIR-1539	When you use the Organization purpose for matching records, if the ID field of one record is a subset of the ID field of another record, the ID fields get 100% match score.

Reference Number	Description
IIR-1478	<p>If you install a product in a subdirectory of the InformaticaIR directory, any subsequent tries to run an installer fails.</p> <p>Workaround: Specify the <code>--install-dir</code> parameter when you start the installer. For example, <code>./install --install-dir InformaticaIR/iir</code> forces the installer to use the InformaticaIR/iir subdirectory instead of the default InformaticaIR directory.</p>
IIR-572	<p>The installer fails when you try to install to an empty preexisting directory.</p> <p>Workaround: Delete the directory and repeat the installation.</p>

Informatica Global Customer Support

You can contact a Global Support Center by telephone or through the Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link:

<https://www.informatica.com/services-and-training/customer-success-services/contact-us.html>.

To find online support resources on the Informatica Network, visit <https://network.informatica.com> and select the eSupport option.
