Preface

The *Informatica MDM - Supplier 360 Release Guide* lists new features, enhancements, and behavior changes between versions. The *Informatica MDM - Supplier 360 Release Guide* is written for the users of Supplier 360.

Informatica Resources

Informatica Network

Informatica Network hosts Informatica Global Customer Support, the Informatica Knowledge Base, and other product resources. To access Informatica Network, visit <https://network.informatica.com>.

As a member, you can:

- Access all of your Informatica resources in one place.
- Search the Knowledge Base for product resources, including documentation, FAQs, and best practices.
- View product availability information.
- Review your support cases.
- Find your local Informatica User Group Network and collaborate with your peers.

Informatica Knowledge Base

Use the Informatica Knowledge Base to search Informatica Network for product resources such as documentation, how-to articles, best practices, and PAMs.

To access the Knowledge Base, visit <https://kb.informatica.com>. If you have questions, comments, or ideas about the Knowledge Base, contact the Informatica Knowledge Base team at KB_Feedback@informatica.com.

Informatica Documentation

To get the latest documentation for your product, browse the Informatica Knowledge Base at https://kb.informatica.com/_layouts/ProductDocumentation/Page/ProductDocumentSearch.aspx.

If you have questions, comments, or ideas about this documentation, contact the Informatica Documentation team through email at infa_documentation@informatica.com.

Informatica Product Availability Matrixes

Product Availability Matrixes (PAMs) indicate the versions of operating systems, databases, and other types of data sources and targets that a product release supports. If you are an Informatica Network member, you can access PAMs at

<https://network.informatica.com/community/informatica-network/product-availability-matrices>.

Informatica Velocity

Informatica Velocity is a collection of tips and best practices developed by Informatica Professional Services. Developed from the real-world experience of hundreds of data management projects, Informatica Velocity represents the collective knowledge of our consultants who have worked with organizations from around the world to plan, develop, deploy, and maintain successful data management solutions.

If you are an Informatica Network member, you can access Informatica Velocity resources at <http://velocity.informatica.com>.

If you have questions, comments, or ideas about Informatica Velocity, contact Informatica Professional Services at ips@informatica.com.

Informatica Marketplace

The Informatica Marketplace is a forum where you can find solutions that augment, extend, or enhance your Informatica implementations. By leveraging any of the hundreds of solutions from Informatica developers and partners, you can improve your productivity and speed up time to implementation on your projects. You can access Informatica Marketplace at <https://marketplace.informatica.com>.

Informatica Global Customer Support

You can contact a Global Support Center by telephone or through Online Support on Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link:

<http://www.informatica.com/us/services-and-training/support-services/global-support-centers>.

If you are an Informatica Network member, you can use Online Support at <http://network.informatica.com>.

Part I: Version 10.3

This part contains the following chapter:

- [New Features and Changes \(10.3\), 7](#)

CHAPTER 1

New Features and Changes (10.3)

This chapter includes the following topics:

- [New Features \(10.3\), 7](#)
- [Changes \(10.3\), 10](#)

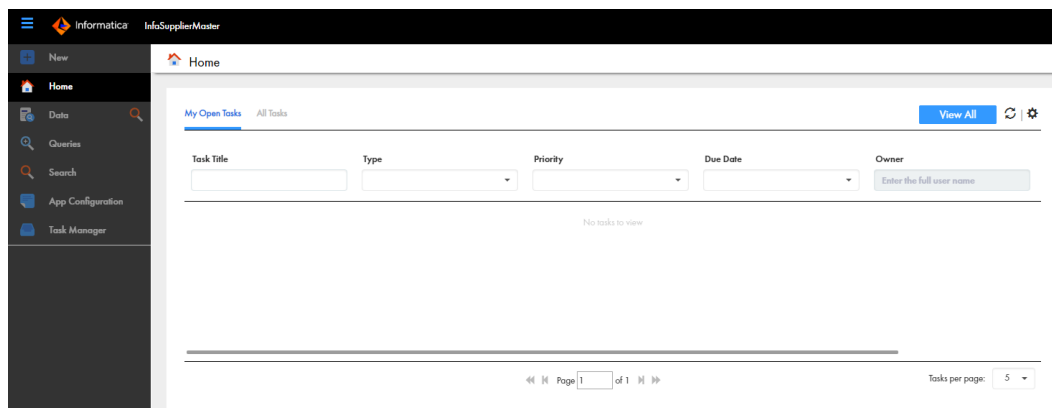

New Features (10.3)

This section describes new features in version 10.3.

Updated Look and Feel for Supplier 360

Supplier 360 uses a navigation bar with vertical tabs. You can now use the **New** tab to add records. The task inbox, Task Manager, and record views are streamlined.

The following image shows the updated look and feel of the navigation bar with the home page open:

Task Manager

The task panel and the review panel appear side-by-side so you can easily manage and view tasks. Also, the **Comments** tab appears in the review panel. You can view all comments about the task in the **Comments** tab.

Previously, the task panel appeared above the review panel. Also, comments appeared in the **All Comments** box in the **Task Details** dialog box.

Task Inbox

The task inbox is streamlined so you can filter and find tasks to work on.

The following image shows the updated look and feel of the task inbox:

For more information about task inbox and Task Manager, see the *Informatica MDM - Supplier 36010.3 User Guide*.

Similar Records Component

You can use the Similar Records component to search for similar records when you create new records. You can decide whether you want to use search or queries to display records in the Similar Records component. You can configure exact or fuzzy queries.

Previously, you could only configure search with the Similar Records component.

For more information about the Similar Records component, see the *Informatica MDM - Supplier 360 10.3 User Guide*.

Search Enhancements

You can configure Supplier 360 to allow users to find business entity records either by using queries or search. Also, you can configure the use of queries or search for manually adding records to record views.

Queries

You can now use queries to perform the following tasks:

- Use queries to find records. You can create, save, and edit queries.
- Use wildcards to search for records.
- Perform a fuzzy search or an exact search. You can configure whether the results of a query are case sensitive or not.
- Configure a basic query or an extended query to find records that contain the query values. The basic queries use simple text comparisons to find records. Extended queries use matching logic and match-enabled attributes to find records.
- Export the current or all the columns in a query result to a CSV file.
- Customize the query results to display the columns that you want to view.
- Use the Provisioning tool to configure the views that you want to use for displaying the query results.

Search

You can now use search to perform the following tasks:

- Use wildcards to search for records.
- Perform a fuzzy search or an exact search. The results of an exact search are not case sensitive.
- Export the current or all the columns in a search result to a CSV file.
- Customize the search results to display the columns that you want to view.
- Use the Provisioning tool to configure the views that you want to use for displaying the search results.

Attach files to tasks

You can attach files to tasks. When tasks are configured to support attachments, you can attach a file to any task that you can view. Files attached to tasks appear in the task details, and user that can view the task can view the attachment.

For more information about attaching files to tasks, see the *Informatica MDM - Supplier 360 Version 10.3 User Guide*.

Security for Business Entities

You can apply MDM Hub user roles to manage access to records based on business entities. You can also use data filters to manage access to records based on the values in the fields and user roles. If you want to restrict the values that can be added to a field, you can create a list of default values for the field.

For more information about the security options, see the *Multidomain MDM Version 10.3 Provisioning Tool Guide*.

Broker User Support in Supplier 360 portal

A broker user refers to a user role that can perform catalog uploads and updates for multiple suppliers. The broker users can switch between the assigned suppliers to perform the operations on behalf of their clients.

In the Supplier Portal of Supplier 360, when a broker user logs in, the Supplier Portal of Product 360 opens. The broker user can use all the Product 360 services available for the role. This feature ensures a single point of access for the suppliers and broker users.

Support to Configure the Answer Types for the Product Related Questions

When you add the product-related questions for the Supplier Portal, you can specify the answer type for each question.

You can use the following answer types:

- **Text.** Allows you to enter any text as the answer.
- **Multi-value.** Allows you to define multiple options, and the user can select an option as the answer. For example, for a confirmatory question, you can have **Yes** and **No** as the options.
- **Date.** Allows you to select a date as the answer.

Support for Task in the Supplier Portal of the Supplier 360

You can view the Product 360 tasks in the Supplier Portal of Supplier 360.

The Task View page of the Supplier Portal displays all the Product 360 tasks, and the users can act on their assigned tasks.

Support for the MDM User Management System

You can deploy Supplier 360 without integrating it with an external user management system and use Multidomain MDM to manage users and authentication process.

For more information about deploying Supplier 360, see the *Informatica MDM - Supplier 360 10.3 Installation and Configuration Guide*.

Localization Support

The user interface labels, the error messages, the business entity metadata, and the lookup data of Supplier 360 are localized in the following languages:

- Chinese
- English
- French
- German
- Japanese
- Korean
- Brazilian Portugese
- Russian
- Spanish

The business entity metadata refers to the resources related to the predefined data model, such as business entity names, menu names, field names, and tasks. The lookup data refers to the predefined list values, such as gender, state, and country values.

Changes (10.3)

This section describes the changes in version 10.3.

Terminology Changes

The following terms have changed in this version:

New	Explanation	Replaces	Where?
Home page	The customizable dashboard that contains the task inbox and other components.	Start page	Data Director
Record	An instance of a business entity. For example, John Smith is a record, while Person is the business entity.	Business Entity	Data Director
Record views	Any view of one or more records in Data Director.	entity view	Data Director, Provisioning tool
Record view layout	A Data Director user interface layout that you can design to view and manage records or tasks in Data Director.	entity view layout	Provisioning tool
Search	The keyword search functionality in Data Director. To search for records, you can enter keywords in a search box.	Smart Search	Data Director, Provisioning tool
New tab	A tab in the navigation bar that you can use to create records.	Create menu or Create in Data View menu	Data Director

Part II: Version 10.1

This part contains the following chapters:

- [New Features and Changes \(10.1 HotFix 4\), 13](#)
- [New Features and Changes \(10.1\), 14](#)

CHAPTER 2

New Features and Changes (10.1 HotFix 4)

This chapter includes the following topic:

- [New Features \(10.1 HotFix 4\), 13](#)

New Features (10.1 HotFix 4)

This section describes new features in version 10.1 HotFix 4.

Secure Connection

You can use a secure HTTPS connection to access the MDM - Product 360 (PIM) services from the Supplier 360 application.

Customizing the Supplier Portal

Based on your requirements, you can customize the Supplier Portal by using the Supplier Portal toolkit. Contact Informatica Global Customer Support for the Supplier Portal toolkit.

For more information about how to use the Supplier Portal toolkit, see the *Informatica MDM - Supplier 360 Supplier Portal Toolkit Developer Guide* that is packaged with the Supplier Portal toolkit.

CHAPTER 3

New Features and Changes (10.1)

This chapter includes the following topics:

- [New Features \(10.1\), 14](#)
- [Changes \(10.1\), 14](#)

New Features (10.1)

This section describes new features in version 10.1.

Application Configuration Tool

The Application Configuration tool allows you to configure the S360 global properties from a graphical user interface. The S360 archive contains a script to install the Application Configuration tool. When installed, the tool runs within Informatica Data Director.

For more information about the Application Configuration tool, see the *Informatica MDM - Supplier 360 10.1.0 Installation and Configuration Guide*.

Supplier 360 Dashboard View

The Supplier 360 Dashboard view is shipped with S360. The Supplier 360 Dashboard view displays supplier details, such as company overview, supplier contacts, onboarding time for the supplier, product category of the supplier, and alternate suppliers. Access the view from the Entity 360 workspace.

For more information about the Supplier 360 Dashboard view, see the *Informatica MDM - Supplier 360 10.1.0 User Guide*.

Changes (10.1)

This section describes the changes in version 10.1.

Common supplierapp-ear.ear File

Effective in version 10.1, a common `supplierapp-ear.ear` file is provided for all supported application servers.

Previously, a separate `supplierapp-ear.ear` file was provided for each application server.
